Profile

MSc in Digital Humanities (EPFL). Six months building SQL models, Power BI dashboards and AI classification at Losinger Marazzi, and six months in computer vision R&D. Looking for a Data Scientist position in French-speaking Switzerland.

Experience

Losinger Marazzi (Bouygues Construction), Warranty, Quality & Prevention — Zurich, Switzerland
Data Scientist Intern — Mar 2026 - Sep 2026

- Delivered three Power BI dashboards end to end and improved about ten existing reports (requirements, semantic modelling, DAX, testing, deployment) in an Agile setup across three environments.
- Developed SQL views in Snowflake and structured data coming from several business software systems.
- Proposed and led the rebuild of the reference taxonomy for warranty defects, then automated the classification of more than 90,000 claims with the internal AI tool: structured comparison of several methods, 5 to 6 parameters varied, 70 to 80% accuracy.
- Built internal AI agents and contributed to a software benchmark to replace the core business system.
- Tools: Python, SQL, Snowflake, Power BI, DAX, Power Automate.

Deep Scouting (STAT12) — Marseille, France
Data Scientist Intern, Computer Vision (R&D) — Mar 2025 - Sep 2025

- Contributed to the development and analysis of the company's computer vision pipelines.
- Master's thesis on football player re-identification from tactical formations: players clustered into tactical lines with K-means, then assigned positional roles from their relative organisation. 62.1% overall accuracy and 76.62% IDF1 on a private annotated dataset.
- Tools: Python, PyTorch.

Deepki, *Customer Solutions Engineer Intern*, Paris, France — 2024
EPFL, *Teaching Assistant*, Lausanne, Switzerland — 2020
Freelance, *Private maths tutor for 5 students*, Lausanne, Switzerland — 2017 - 2021

Education

EPFL — Lausanne, Switzerland
Master of Digital Humanities, GPA 5.07 / 6.00 — 2022 - 2025
Data science, machine learning, neural networks, computer vision, digital musicology.

EPFL — Lausanne, Switzerland
Bachelor of Communication Systems, GPA 5.02 / 6.00 — 2018 - 2022
Analysis, databases, computer security, machine learning, theory of computation.

Projects

- **Bazar (personal project, 2026)**: self-hosted music library app for a few friends: checks each track against the official tracklist, tags it and files it. Python, FastAPI, SQLite, Docker.
- **Les Mémoires de la Commune (EPFL)**: text mining of the Paris Commune memoirs: embeddings, NER, LDA.
- **What makes a movie bad? (EPFL)**: data analysis of poorly rated films (IMDb, CMU Movie Summary Corpus) with a focus on cast gender balance: a negative raw correlation with ratings, but no significant effect in an observational study by decade. Pandas, SciPy, Seaborn.

Skills

Programming: Python, SQL, R, Java, C, Matlab
Data & BI: Snowflake, Databricks, Power BI (DAX), Power Automate, Docker, Git
ML & AI: machine learning, deep learning (PyTorch), NLP, computer vision, AI agents, Claude Code
Languages: French (native), Persian (native), English (C1), German (B2), Spanish (B1)
Interests: cinema, music (Ableton, piano), table tennis (CTT Pully)
